PROFESSIONAL SUMMARY

Software Development Engineer (SDE) candidate with hands-on internship experience in **full-stack development**, **RESTful API design**, debugging, and deployment. Proficient in **Java, Python, JavaScript, React, Node.js, Express.js, MongoDB, and MySQL**, with exposure to **machine learning** and **cybersecurity**. Delivered multiple end-to-end applications with authentication, database persistence, and third-party API integration across 3 internships.

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, SQL, HTML5, CSS3
Frameworks & Libraries: React, Node.js, Express.js, Flask, MERN Stack
Databases: MongoDB, MySQL
Core Skills: Full-Stack Development, REST API Design, JWT Authentication, Debugging, Database Design, API Integration, Machine Learning, Reverse Engineering
Tools & Platforms: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Eclipse, VMware, Kali Linux, n8n, Cursor

WORK EXPERIENCE

Product Delivery Intern | Prodapt Solutions Pvt Ltd **Dec 2025 - Feb 2026**

- Developed a Forward Deployed Engineer (FDE) learning and practice platform simulating end-to-end delivery workflows: requirements analysis, development, debugging, integration, and deployment.
- Designed structured training modules on technical problem-solving, customer communication, debugging, and solution delivery to support candidate training and evaluation.

AIML Intern | Edunet Foundation - IBM SkillBuild **Sep 2025 - Oct 2025**

- Built an AI/ML-based application in Python that integrates external REST APIs to process and display real-time data.
- Applied machine learning fundamentals, Flask, and frontend technologies to develop, test, and validate application workflows.

Backend Developer Intern | CodTech **May 2025 - Jun 2025**

- Built and deployed 3 full-stack MERN applications: a Blog API, a Movie Recommendation System, and a Chat Application.
- Designed RESTful APIs, backend workflows, authentication, and database operations using Node.js, Express.js, and MongoDB.

PROJECTS

Cryptography Algorithm Detection | Python, Machine Learning, Reverse Engineering

- Engineered a multi-modal analysis framework that identifies 16 cryptographic configurations and detects unknown algorithms in disassembled firmware.
- Applied reverse engineering and machine learning techniques to analyze firmware-level cryptographic implementations.

AI-Powered Room Designer | AI Rendering, Image Processing, Full-Stack

- Built an AI-powered room visualization platform that generates before/after designs from user-selected configurations.
- Implemented image upload, AI-based rendering, and side-by-side comparison workflows for interactive design visualization.

Subscription Tracker App | MongoDB, Node.js, Express.js, React, JWT

- Developed a full-stack subscription management platform to track payments, renewal dates, and subscription details.
- Implemented JWT authentication, automated renewal reminders, and MongoDB persistence to manage subscription workflows.

EDUCATION

Sri Venkateswara College of Engineering, Sriperumbudur **Sep 2023 - Apr 2027 (Expected)**

Bachelor of Engineering (B.E.) in Computer Science

- **Relevant Coursework:** AI & Data Science, Machine Learning, Statistics, Social Networks, Cryptography, Ethical Hacking, Compiler Design, Internet of Things (IoT)
